Log:

- 31/03/2023

Bryan shared the document to the others of where we would do it, Tanzim created the outlines of the document, Glenn created the table of contents and the header sections.

- 01/04/2023

Bryan worked on some user stories, Tanzim drafted the idea for the domain model, Glenn worked on a rough base design of the prototype

- 02/04/2023

Bryan then worked on a few interactions in the prototype, adding some more elements to it. Glenn & Tanzim worked on the user stories, adding some more as well.

- 03/04/2023

Bryan & Glenn took a look at the domain model Tanzim drafted and made some changes. Tanzim decided to work on more interactions in the prototype

- 04/04/2023

Bryan & Glenn added a few more user stories after realising some rules were not mentioned there, then Tanzim finished off the extra requirements of the prototype

- 05/04/2023

There was a meeting today at night where we cleared up everything that was wrong and helped each other out. We also filled in our team information and also the technology stack + justification. This is where we also discussed heavily on the domain model and the explanation for every entity, including the additional requirement

06/04/2023

We pushed everything that we needed to submit after checking back one last time on all the key deliverables.
